

KOMEG STYLI ROUGHNESS AND FORM

Special Solutions and Repairs:

KOMEG repair your defect styli, such as a broken shaft or a worn diamond stylus tip.

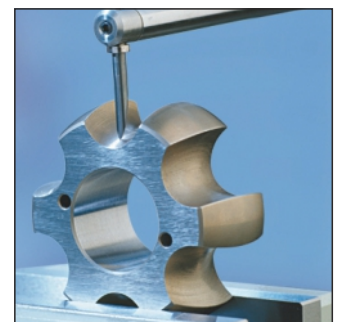

Do you have to perform a complicated measuring task? Are you unable to find a suitable standard stylus? KOMEG will be obliged to provide you with full support as well as with a special solution that fits your needs.

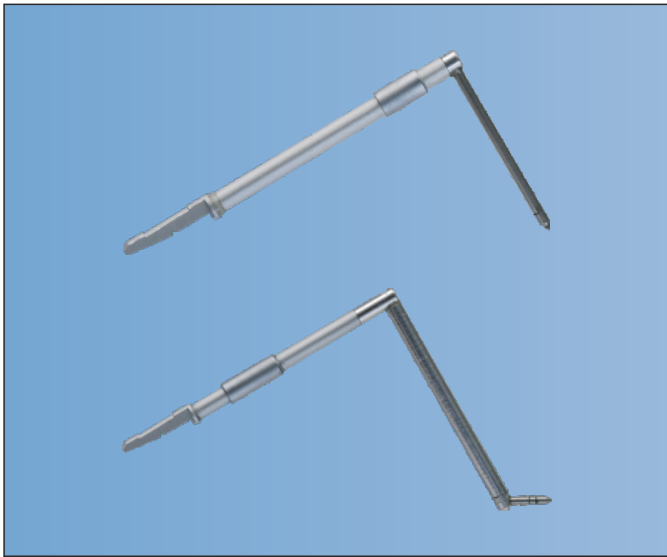

S

ervices:

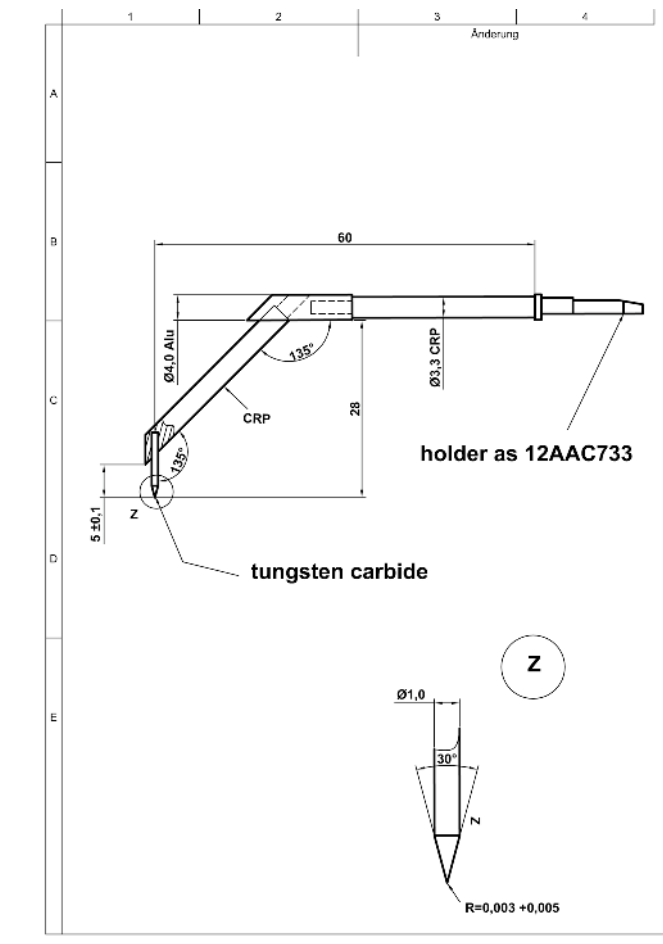

- Replacement of defective stylus tips, e.g. diamond stylus tip 60° with R=2µm
- Exchange of defective stylus fixtures and stylus shafts
- Shortening or extending stylus tips, e.g. for the measurement of surface quality in small holes or in deep grooves
- Construction and manufacturing of customerspecific stylus configurations, e.g. for the measurement of hard to reach diameters or surfaces at awkward angles
- Modification of standard styli of all common brand names

KOMEG: Noticeably more experience - measurably better results

- For special requirements we are able to design customerspecific special styli and configurations
- KOMEG not only supply styli of the highest quality, they will also advise you about their applications while assisting you in solving your measuring tasks
- KOMEG styli are manufactured from high quality materials according to the latest technological know-how. All utilised materials must comply with the highest standards. For example, we make use of Mitutoyo high precision diamond stylus tips

info Prices of mentioned services and terms of delivery are supplied upon request, or after inspection of damaged components.
