

Mitutoyo Corporation is the world's major manufacturer of precision measuring instruments in the field of dimensional metrology and related instruments. It employs over 4000 people worldwide and has affiliations in all major industrial countries.

Mitutoyo Research Center Europe (RCE) is part of the world-wide Mitutoyo research organisation. In this research center, new concepts, principles and technologies are developed for the metrology foundation and other quality aspects of Mitutoyo products. Innovations are made that lead to the enhancement of current products but they can also be the basis of completely new product lines.

To strengthen our team we are currently seeking a

Researcher

Aim of the position is to carry out research and contribute to the continuous developing level of know-how and technology within the Mitutoyo corporation. The position contributes to the development of research programs within Mitutoyo RCE and within the Mitutoyo corporation.

Tasks:

- active exploration of RCE's research field in the context of Mitutoyo's present and future product range.
- contribute to the development of research programs
- contribute to the management of research programs
- carry out technical-scientific research
- publish and present research results internally and externally

Qualification:

MSc or PhD in a relevant discipline, i.e. mechanical engineering or physics or equivalent qualifications by experience

- Interest in dimensional metrology
- Good knowledge of English in speaking and writing
- Experience in computer programming
- Research experience in a business environment

Location: Best, near Eindhoven, The Netherlands.
